1	<i>Objectives of Cost Accounting</i>
----------	---

Q.1.1	2014 - May [5] (a), 2016 - May [5] (a), 2019 - May [6] (a), 2021 - Dec [6] (e), RTP	Distinguish Between
Distinguish Between Cost Control and Cost Reduction. (4,4,5,5 marks)		

Answer:

Difference Between Cost Control and Cost Reduction			
S. No.	Basis of Difference	Cost Control	Cost Reduction
1	Meaning	Cost control is the guidance and regulation by executive action of the cost of operating an undertaking.	Cost reduction is the achievement of real and permanent reduction in the unit cost of goods and services without impairing their suitability.
2	Emphasis	It emphasises on past performance and variance analysis.	It emphasises on present and future performance without considering the past performance.
3	Approach	It is a conservative approach which stresses on the conformity to the set norms.	It is a dynamic approach where in every function is analysed in view of its contribution.
4	Focus	It is a short term review with focus on reducing cost in a particular period.	It seeks to reduce unit cost on a permanent basis based on a systematic approach.
5	Nature of Function	It is a preventive function.	It is a corrective function.

Q.1.2	2016 - May [7] (b), RTP	Descriptive
What is cost accounting? Enumerate its important objectives. (4 marks)		

Answer:

Cost Accounting is defined as “the process of accounting for cost which begins with the recording of income and expenditure or the bases on which they are calculated and ends with the preparation of periodical statements and reports for ascertaining and controlling costs.”

- Cost accounting primarily deals with collection and analysis of relevant cost data for interpretation and presentation for various problems of management.
- Cost accounting is the application of accounting and costing principles, methods and techniques in the ascertainment of costs and analysis of saving and /or excess as compared with previous experience or with standards.

The Objectives of Cost Accounting are as follows:

1.	To ascertain and analyse costs	The primary objective of cost accounting is to ascertain and analyse costs incurred on the production of various products, jobs and services etc.
2.	To control costs	There are a number of techniques in cost accounting like standard costing and budgetary control for controlling cost.
3.	To reduce costs	By now, the objective of cost accounting has been extended to reduce costs. For cost reduction plan, products, processes, procedures, organisation, and methods are continuously reviewed or scrutinized in order to improve efficiency and to reduce cost.
4.	To fix the selling price	Under cost accounting, reliable data is provided to act as a base for fixing selling prices.
5.	To prepare periodic statements	In cost accounting system, periodic cost statements (viz. monthly, quarterly) for review of operating results are prepared.

6.	To provide information	Cost accounting provides useful information for planning and control and for taking various decisions regarding increase in production, installation or replacement of a machine, making or buying of a component, continuing or closing down of a business etc.
7.	To ascertain the profit of each activity	The profit of any activity can be ascertained by matching cost with the revenue of that activity. The purpose under this step is to determine costing profit or loss of any activity on an objective basis.
8.	To assist the management in decision making	Decision making is defined as a process of selecting a course of action out of two or more alternative courses. For making a choice between different courses of action, it is necessary to make a comparison of the outcomes, which may be arrived under different alternatives.

2	<i>Relationship of Cost and with other Related Disciplines Management Accounting</i>
----------	---

Q.2.1	2017 - May [7] (b), 2020 - Nov [6] (a) RTP	Distinguish Between
State the difference between Cost Accounting and Management Accounting. (4, 5 marks)		

Answer:

Difference Between Cost Accounting and Management Accounting			
S. No.	Basis	Cost Accounting	Management Accounting
1.	Nature	It records the quantitative aspect only.	It records both qualitative and quantitative aspect.
2.	Objective	It records the cost of producing a product and providing a service.	It provides information to management for planning and co-ordination.
3.	Area	It only deals with cost Ascertainment.	It is wider in scope as it includes F.A., budgeting, Tax, planning.
4.	Recording of Data	It uses both past and present figures.	It is focused with the projection of figures for future.
5.	Development	It's development is related to industrial revolution.	It develops in accordance to the need of modern business world.
6.	Rules and Regulation	It follows certain principles and procedures for recording costs of different products.	It does not follow any specific rules and regulations.

3

Users of Cost and Management Accounting

Q.3.1	2018 - May [6] (a)	Descriptive
-------	--------------------	-------------

3.30	■	Scanner CA Inter Group - I Paper - 3
-------------	---	---

Answer the following:
 Why are cost and management accounting information are required by the staff at operational level? Describe. (5 marks)

Answer:
 The operational level staff like supervisors, foreman, team leaders are require cost and management accounting information:

1. To know the objectives and performance goals for them.
2. To know product and service specification like volume, quality and process etc.
3. To know the performance parameters against which their performance is measured and evaluated.
4. To know divisional (responsibility centre) profitability etc.

4	Essentials of a Good Cost Accounting System
----------	--

Q.4.1	2022 - May [6] (a)	Descriptive
Answer the following: Briefly explain the essential features of a good Cost Accounting System. (5 marks)		

Answer :

To be successful, a good cost accounting system should possess the following essential features:

1.	Simple and easy to operate	The system to be simple practical, flexible and capable of meeting the requirements of a concern.
2.	Accuracy	The data to be used by the cost accounting system should be exact & accurate otherwise the output of the system will not be correct.

3.	Cost-effective	The cost of installing and operating the system should justify the results. The benefit from the system should exceed the amount to be spent on it.
4.	Management's Role	The top management should have full faith in the costing system and should provide help towards its development and success.
5.	Relevance of Data	The system should handle and report relevant data for use of managers for decision making. It should not sacrifice its utility by introducing meticulous and unnecessary details.
6.	Participation by executives	Necessary co-operation and participation of executives from various depts. of the concern is essential for developing a good system of cost accounting.

5

Installation of Costing System

Q.5.1	2017 - May [5] (b)	Descriptive
What are the essential factors for installing a cost accounting system? Explain.		(4 marks)

Answer:

Essential Factors for installing a Cost Accounting System:

1.	Objective	The objective of cost system should be considered before installation. Whether to fix selling prices or control costs or both.
----	------------------	--

2.	Nature of Business	The costing system, which is suitable to the business organisation, should be introduced.
3.	Organisational Hierarchy	Costing system should fulfill the requirement of different level of management. Organisation structure should be studied to determine the manner in which costing system should be introduced.
4.	Knowing the Product	Nature of Product determines the type of costing system to be implemented. The product which has by-products requires costing system which account for by-products as well.
5.	Knowing the Production Process	A good costing system can never be established without the complete knowledge of production process.
6.	Method of Maintenance of Cost Records	The manner in which Cost and Financial accounts could be inter-locked into a single integral accounting system and in which results of separate sets of accounts, cost and financial, could be reconciled by means of control accounts.

6	<i>Cost Objects</i>
----------	----------------------------

Q.6.1	2014 - May [7] (e) (ii)	Descriptive
<p>State the unit of cost for the followings :</p> <ol style="list-style-type: none"> 1. Transport 2. Power 3. Hotel 		

4. Hospital

(2 marks)

Answer:**Unit of Cost:**

1.	Transport	Passenger km., Tonne km.
2.	Power	Per kilowatt - hours
3.	Hotel	Per room, per day
4.	Hospital	Patient per day, room per day or per bed, per operation, etc.

Q.6.2	2019 - Nov [6] (d)	Descriptive
<p>Answer the following :</p> <p>Mention the Cost Unit of the following Industries:</p> <ul style="list-style-type: none"> (i) Electricity (ii) Automobile (iii) Cement (iv) Steel (v) Gas (vi) Brick Making (vii) Coal Mining (viii) Engineering (ix) Professional Services (x) Hospital. 		
		(5 marks)

Answer:

	Industry	Cost Unit Basis
(i)	Electricity	Kilowatt-hour (kWh)
(ii)	Automobile	Number
(iii)	Cement	Ton/per bag etc.
(iv)	Steel	Ton
(v)	Gas	Cubic feet
(vi)	Brick Making	1000 bricks

3.34	■	Scanner CA Inter Group - I Paper - 3
-------------	---	---

(vii)	Coal Mining	Tonne/Ton
(viii)	Engineering	Contract, job
(ix)	Professional Services	Chargeable hour, job contract
(x)	Hospital	Patient day

Q.6.3	2022 - Nov [6] (e)	Descriptive
<p>Answer the following: Mention the cost units (physical measurements) for the following Industry/product:</p> <ul style="list-style-type: none"> (i) Automobile (ii) Gas (iii) Brick works (iv) Power (v) Steel (vi) Transport (by road) (vii) Chemical (viii) Oil (ix) Brewing (x) Cement <p style="text-align: right;">(4 marks)</p>		

Answer:

Industry or product	Cost unit Basis
Automobile	Number
Gas	Cubic feet
Brick-work	Number of bricks
Power	Kilo-watt hour (kwh)
Steel	Tonne
Transport (by road)	Passenger-kilometer or Tonne-kilometer
Chemicals	Litre, gallon, kilogram, tonne etc.

Oil	Barrel, tonne, litre
Brewing	Barrel
Cement	Ton/per bag etc.

Q.6.4	2023 - May [6] (a)	Descriptive
Answer the following question: Define cost objects and give examples of any four cost objects. (5 marks)		

7

Responsibility Centres

Q.7.1	2015 - May [5] (a), 2016 - Nov [5] (a) (i) (ii)	Descriptive
Define 'Cost Centre' and state its types.		(4, 4 marks)
OR	2016 - Nov [5] (b)	Descriptive
What is meant by 'Cost Centre'? What are the different types of cost centres.		(4 marks)

Answer:

Cost Centre	
Meaning	It is defined as a location, person, or an item of equipment (or group of these) for which cost may be ascertained and used for the purpose of cost control. It is a part of an organization that does not produce direct profits and adds to the cost of running a company. Eg. R&D, marketing departments, help desk and customer services. Cost Centre are of two types: (i) Personal (ii) Impersonal

A personal cost centre consists of a person and an impersonal Cost Centre of a location or item of equipment.		
1	Production Cost Centre	It is cost centre where raw material is handled for conversion into finished product. Here both direct and indirect expenses are incurred. Machine shops, welding shops and assembly shops are examples of production Cost Centre.
2	Service Cost Centre	It is Cost Centre which serves as an ancillary unit to a production cost centre. Power house, gas production shop, material service centres, and plant maintenance centres are examples of service Cost Centre.
3	Profit Centre	Centres, which have the responsibility of generating and maximizing profits are called profit centres. The profit centre's revenues and expenses are kept separate from the main company's profit in order to maintain the profit centre's profitability.
4	Investment Centres	Investment centres are similar to profit centres but they have additional decision rights in terms of capital expenditure and investment. The manager is assumed to have better knowledge of input and output markets but also investment opportunities.

— Space to write important points for revision —

Q.7.2	2016 - May [7] (e) (ii)	Descriptive
What is meant by 'Profit Centre'?		(2 marks)

Answer:
 A profit centre is the centre whose performance is measured in terms of income earned and cost incurred. Its main responsibility is to generate and maximise profit.

Profit Centres is a branch or division of a company that is accounted for on a standalone basis for the purpose of profit calculation. A profit center is responsible for generating its own result and earnings, and as such, its managers generally name decision making authority related to product pricing and operating expenses. Profit centres are crucial in determining which units are the most and least profitable within an organisation.

Q.7.3	2017 - May [5] (a), RTP	Descriptive
Explain 'Cost Unit' and 'Cost Centre'.		(4 marks)

Answer:

Cost Unit:

It is a unit of product, service or time (or combination of these) in relation to which costs are ascertained or expressed. It is a unit of measurement. For example the cost of carrying a passenger in terms of km, cost of hotel room expressed as cost per day etc.

Cost Centre:

It is a location, person or an item of equipment (or group of these) for which cost is ascertained and used for the purpose of cost control. The main purpose of ascertaining cost centre is to control the cost and to fix responsibility of the person in charge of a cost centre.

Cost Centres are of two types:

1. Personal Cost Centre.
2. Impersonal Cost Centre.

Cost Centres in a manufacturing concern:

1. Production Cost Centre
2. Service Cost Centre.

— Space to write important points for revision —

Q.7.4	2018 - Nov [6] (a)	Descriptive
Answer the following: Mention and explain types of responsibility centres.		(5 marks)

Answer:

Four types of responsibility centres are

1. Cost Centres
2. Revenue Centres
3. Profit Centres
4. Investment Centres

1. Cost Centres:

The responsibility centre which is held accountable for insurance of costs which are under its control. The Performance of this responsibility centre is measured against pre-determined standards or budgets. The cost centres are of two types:

- (a) Standard cost centre and (b) Discretionary cost centre

(a) Standard cost centre:

Cost centre where output is measurable and input required for the output can be specified. Based on a well-established study, an estimate of standard units of inputs to produce a unit of output is set. The actual cost for inputs is compared with the standard cost. Any deviation (Variance) in cost is measured and analysed into controllable and uncontrollable cost. The manager of the cost centre is supposed to comply with the standard and held responsible for adverse cost variances. The input- output ratio for a standard cost centre is clearly identifiable.

(b) Discretionary cost centre:

The cost centre whose output cannot be measured in financial terms, thus input output ratio cannot be defined. The cost of input is compared with allocated budget for the activity. Example of discretionary cost centres are Research & Development department, Advertisement department where output of these department cannot be measured with certainty and co-related with cost incurred on inputs.

2. Revenue Centres:

The responsibility centres which are accountable for generation of revenue for the entity. Sales Department for example, is responsible for achievement of sales target and revenue generation. Though, revenue does not have control on expenditures it incurs but some time expenditures related with selling activity like commission to sales person etc. are incurred by revenue centres.

3. Profit Centres:

These are the responsibility centres which have both responsibility of generation of revenue and incurrance of expenditures. Since, managers of profit centres are accountable for both costs as well as revenue, profitability is the basis for measurement of performance of these responsibility centres are decentralised branches of an organisation.

4. Investment Centres:

These are the responsibility centres which are not only responsible for profitability but also has the authority to make capital investment decisions. The performance of these responsibility centres are measured on the basis of Return on Investment (ROI) besides profit. Examples of investment centres are Maharatna, Navratna and Maniratna companies of public sector undertakings of central government.

Q.7.5	2021 - July [6] (a)	Descriptive
<p>Answer the following: Specify the types of Responsibility centres under the following situations:</p> <ul style="list-style-type: none"> (i) Purchase of bonds, stocks, or real estate property. (ii) Ticket counter in a Railway station. (iii) Decentralized branches of an organization. (iv) Maharatna, Navratna and Miniratna public sector undertaking (PSU) of Central Government. (v) Sales Department of an organization. (5 marks) 		

Answer:

Situation		Type of Responsibility Centre
(i)	Purchase of bonds, stocks or real estate property.	Investment Centre
(ii)	Ticket counter in a Railway Station	Revenue Centre
(iii)	Decentralized branches of an organization	Profit Centre
(iv)	Maharatna, Navratna and Miniratna public sector undertaking (PSU) of Central Government)	Investment Centre
(v)	Sales Department of an organization	Revenue Centre

8	<i>Classification of Costs : By Variability or Behaviour</i>
----------	---

Q.8.1	2004 - Nov [2] (a)	Descriptive
Discuss cost classification based on variability.		(2 marks)

Answer:

Classification on the basis of Variability:

On the basis of variability, cost are classified into three types:

1. Fixed cost
 2. Variability cost
 3. Semi-variable cost.
- 1. Fixed cost**

Meaning	CIMA defines fixed cost as “A cost which accrues in relation to the passage of time and which when certain output or turnover limits, tends to be unaffected by fluctuation in volume of output or turnover.
Characteristics	<ul style="list-style-type: none"> (i) Amount of fixed cost remain constant for every level of output. (ii) Average fixed cost (i.e. fixed cost per unit) will decrease with increased output. (iii) Fixed cost is generally managed and controlled by the higher management.
Example	Insurance, salary, rent etc.

2. Variable Cost

Meaning	CIMA defines variable cost as “A cost which in aggregate tends to vary in direct proportion to change in the volume of output or turnover.”
Characteristics	<ul style="list-style-type: none"> (i) Variable cost varies directly with output/Sales. (ii) Variable cost is easily chargeable to output or department. (iii) Variable cost is generally managed and controlled by the department heads.
Example	Direct materials cost Direct Labour Cost.

3. Semi Variable Cost

Meaning	CIMA defines semi variable cost as “A cost containing both fixed and variable elements, which is, therefore, partly affected by fluctuations in the output or turnover.
Characteristics	<ul style="list-style-type: none"> (i) Amount of semi-variable is neither fixed nor varies directly along with the output. (ii) Semi-variable expenses are generally managed by various levels of management jointly.

Example	Telephone bill, electricity bill etc.
----------------	---------------------------------------

— Space to write important points for revision —

9	Classification of Costs : By Controllability
----------	---

Q.9.1	2008 - May (i) (iii)	Descriptive
Discuss cost classification on the basis of Controllability		(2 marks)

Answer:

Classification on the basis of Controllability:

On the basis of controllability cost is classified into two types:

1. Controllable cost
 2. Non-controllable cost
- 1. Controllable Cost:** CIMA defines controllable cost as “Cost chargeable to a cost centre, which can be influenced by the action of the person in whom control of the centre is vested.”
In practice all variable cost are controllable cost.
Example: Direct cost i.e. direct material cost, direct laour cost.
- 2. Non-Controllable Cost:** CIMA defines non-controllable cost as a “Cost chargeable to a cost centre which cannot be influenced by the action of the person in whom control of the centre is vested.”
In practice all fixed costs are non-controllable cost. Therefore such cost cannot be controlled by the responsibility manager.
Example: Expenditure on any service department is controlled by the manager of that service department but if such expenditure is apportioned to production on dept. then manager of that production dept. cannot control the expenditure of the service department.

10

**Classification of Cost : By Costs for
Managerial Decision Making**

Q.10.1	2014 - May [5] (b) (i)	Descriptive
Explain the following: Explicit costs		(2 marks)

Answer:

Explicit Cost: Explicit costs refers the cost, involving immediate payment of cash, such as - Salary, wages, commissions etc. Such costs are easily measurable it is also known as out of pocket cost.

Implicit Costs: It do not involved any immediate cash payment. It is also known an economic costs.

The main difference between Explicit cost and Implicit costs are:

1. Explicit costs involves immediate outflow of cash where as implicit costs do not involve immediate cash payment.
2. Explicit costs are entered in the books of accounts. Where as implicit costs are not recorded in the book of account.

Q.10.2	2016 - Nov [7] (d) (ii)	Short Notes
Write short notes on (i) Conversion Cost (ii) Sunk Cost (iii) Opportunity Cost		(2 marks)
OR	2018 - May [6] (e) (i)	Descriptive
Explain: (i) Opportunity Cost.		(2.5 marks)

Answer:

(i) **Conversion Cost:** It is the cost incurred to convert raw materials into finished goods. It is the sum of direct wages, direct expenses and manufacturing overheads.

Formula:

$$\text{Conversion Cost} = \text{Direct Labour Cost} + \text{Direct Expenses} + \text{Manufacturing Overhead}$$

Or

$$\text{Conversion Cost} = \text{Factory Cost} - \text{Direct Materials Cost.}$$

(ii) **Sunk Costs:** Sunk costs are the historical costs which are incurred in the past. They play no role in decision making in the current period.

(iii) **Opportunity Costs:** Opportunity costs refers to the value of sacrifice made or benefit of opportunity foregone in accepting alternative course of action. For e.g. a company accepts an expansion plan and for financing, withdraws money from its bank deposits. Then, the loss of interest on the bank deposits is the opportunity cost for carrying out the expansion plan. This cost plays an important role in managerial decision making process although these costs are not recorded in books of accounts.

Q.11.8	RTP	Descriptive
Discuss the four different methods of costing alongwith their applicability to concerned industry.		(4 marks)

Answer:

The various method of costing can be summarised as under:

1. Batch Costing: This costing is based on the concept of contract costing. This method is used to determine the cost of a group of identical or similar products. The batch costing of similar products is the unit and not single item within the batch. This method can be applied for the production of nuts and bolts, medicines and other items which are manufactured in distinct batches.

2. **Job Costing:** This method is used in those concerns where production is carried out as per specific orders and specifications. Each job is separate and distinct from other jobs and products. This method is popular in enterprises engaged in house building, ship-building, machinery production and repairs etc.
3. **Contract Costing:** This method of counting, based on the principle of job costing, is used by house builders and civil contractors. The contract becomes the cost unit for which relevant cost are accumulated.
4. **Single or Unit Costing:** This method is used where a single item is produced and the final production is composed of homogenous units. The per unit cost is obtained by dividing the total cost by the total number of unit of units manufactured.
5. **Process Costing:** Under this method of costing, the cost of completing each stage of work is ascertained, like cost of making pulp and cost of making paper from pulp. This method is used in those industries where manufacturing is done continuously like chemicals, oil, gas paper etc.
6. **Multiple Costing:** This method is used in those industries where the nature of product is complex such as motor cars, aeroplanes etc. In such cases costs are accumulated for different component making the final product and then totaled to ascertain total cost of product.
7. **Operating Costing:** Ascertainment of cost of rendering or operating a service is called “service or operating costing”. It is used in case of concerns rendering services like transport, cinema, hotels etc. where there is no identifiable tangible cost limit.

Cost Accounting.

(5 marks)

Answer:

Example of Impact of Information Technology in cost accounting may include the following:

- (i) After the introduction of ERPs, different functional activities get integrated and as a consequence a single entry into the accounting system provides custom made reports for every purpose and saves an organisation from preparing different sets of documents. Reconciliation process of results of both cost and financial accounting systems become simpler and less sophisticated.
- (ii) A move towards paperless environment can be seen where documents like Bill of Material, Material Requisition Note, Goods Received Note, labour utilisation report etc. are no longer required to be prepared in multiple copies, the related department can get e-copy from the system.
- (iii) Information Technology with the help of internet (including intranet and extranet) helping in resource procurement and mobilisation. For example, production department can get materials from the stores without issuing material requisition note physically. Similarly, purchase orders can be initiated to the suppliers with the help of extranet. This enables an entity to shift towards Just-in-Time (JIT) approach of inventory management and production.
- (iv) Cost information for a cost centre or cost object is ascertained with accuracy in timely manner. Each cost centre and cost object is codified and all related costs are assigned to the cost objects or cost centres using assigned codes. This automates the cost accumulation and ascertainment process. The cost information can be customised as per the requirement. For example, when an entity manufacture or provide services, are able to know information job-wise, batch-wise, process-wise, cost centre wise etc.

- (v) Uniformity in preparation of report, budgets and standards can be achieved with the help of IT. ERP software plays an important role in bringing uniformity irrespective of location, currency, language and regulations.
- (vi) Cost and revenue variance reports are generated in real time basis which enables the management to take control measures immediately.
- (vii) IT enables an entity to monitor and analyse each process of manufacturing or service activity closely to eliminate non value added activities.

Techniques of Costing

Q.13.1	2021 - Dec [6] (a)	Descriptive
Answer the following: Briefly explain the 'techniques of costing'.		(5 marks)

Answer:

Techniques	Description
Uniform Costing	<p>When a number of firms in an industry agree among themselves to follow the same system of costing in detail, adopting common terminology for various items and processes they are said to follow a system of uniform costing.</p> <p>Advantages of such a system are:</p> <ul style="list-style-type: none"> i. A comparison of the performance of each of the firms can be made with that of another, or with the average performance in the industry. ii. Under such a system, it is also possible to determine the cost of production of goods which is true for the industry as a whole. It is found useful when tax-relief or protection is sought from the Government.

Marginal Costing	It is defined as the ascertainment of marginal cost by differentiating between fixed and variable costs. It is used to ascertain effect of changes in volume or type of output on profit.
Standard Costing and Variance Analysis	It is the name given to the technique whereby standard costs are pre-determined and subsequently compared with the recorded actual costs. It is thus a technique of cost ascertainment and cost control. This technique may be used in conjunction with any method of costing. However, it is especially suitable where the manufacturing method involves production of standardised goods of repetitive nature.
Historical Costing	It is the ascertainment of costs after they have been incurred. This type of costing has limited utility. <ul style="list-style-type: none"> • Post Costing: It means ascertainment of cost after production is completed. • Continuous costing: Cost is ascertained as soon as the job is completed or even when the job is in progress.
Absorption Costing	It is the practice of charging all costs, both variable and fixed to operations, processes or products. This differs from marginal costing where fixed costs are excluded.
Direct costing	Direct costing is a specialized form of cost analysis that only uses variable costs to make decisions. It does not consider fixed costs, which are assumed to be associated with the time periods in which they are incurred.
